

A Collection of Fails

Tori Stutzman

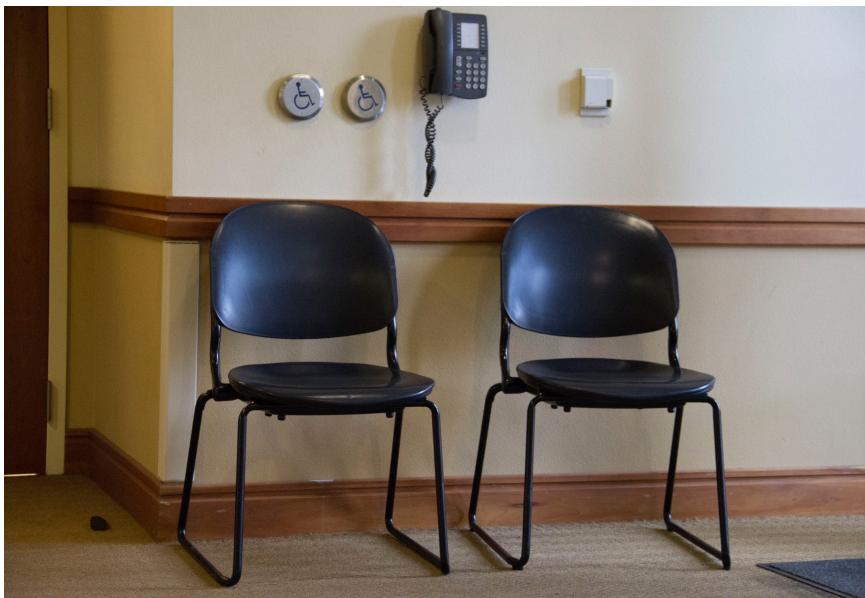

My collection is derived from a list of handicap fails around Monmouth and Western. Handicap fails are areas that comply with ADA law, but are actually not very practical applications of the law.

I will primarily use images of handicap fails that I have found around Monmouth/Western as well as on the internet. I will also be asking friends and classmates to send me images of handicap fails as well.

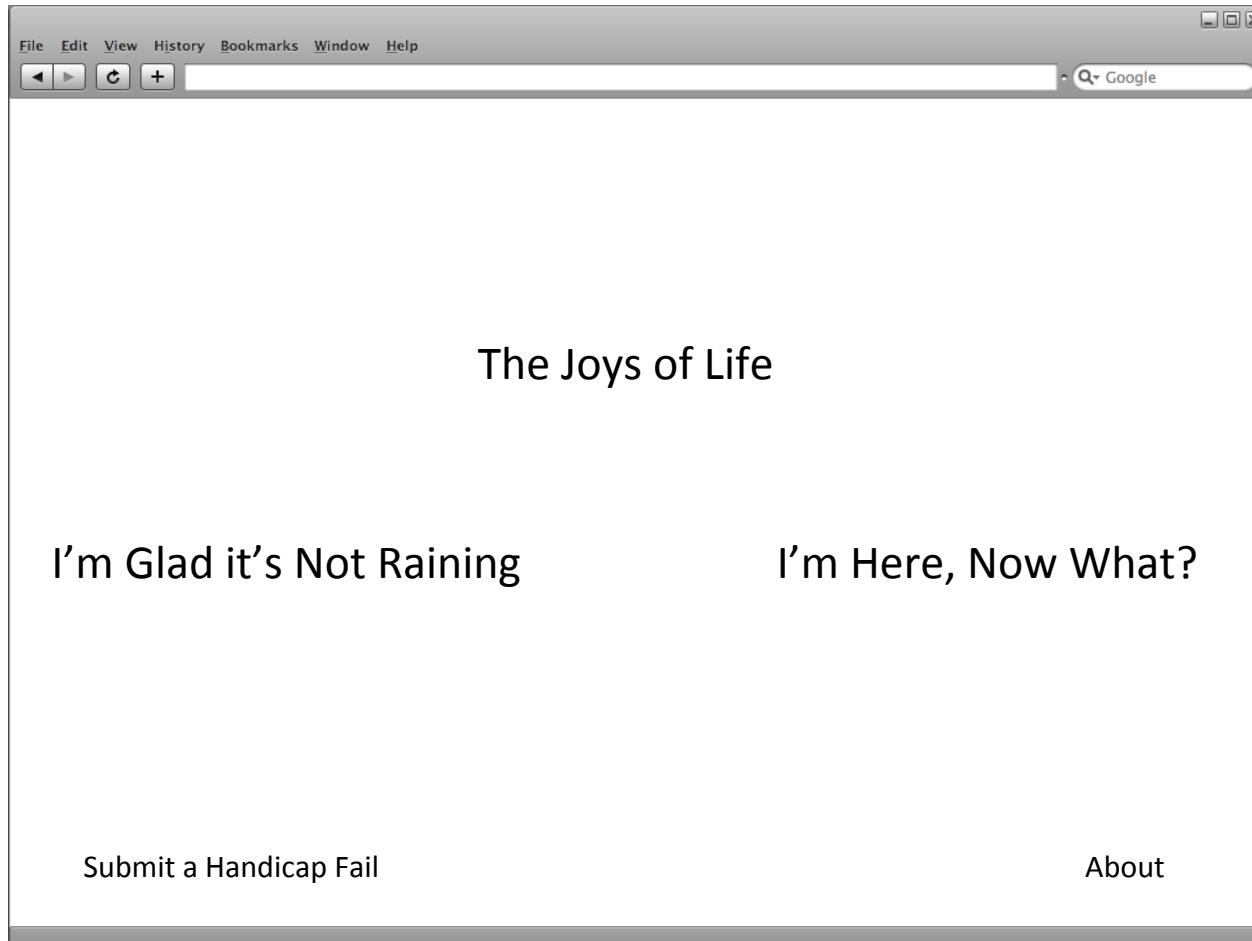

This site will emphasize the diversity of the handicap fails as well as the inconvenience they pose to physically handicapped people. It will be divided into three sections: 1) contains the entire collection, 2) contains the outside handicap fails, and 3) contains the indoor handicap fails.

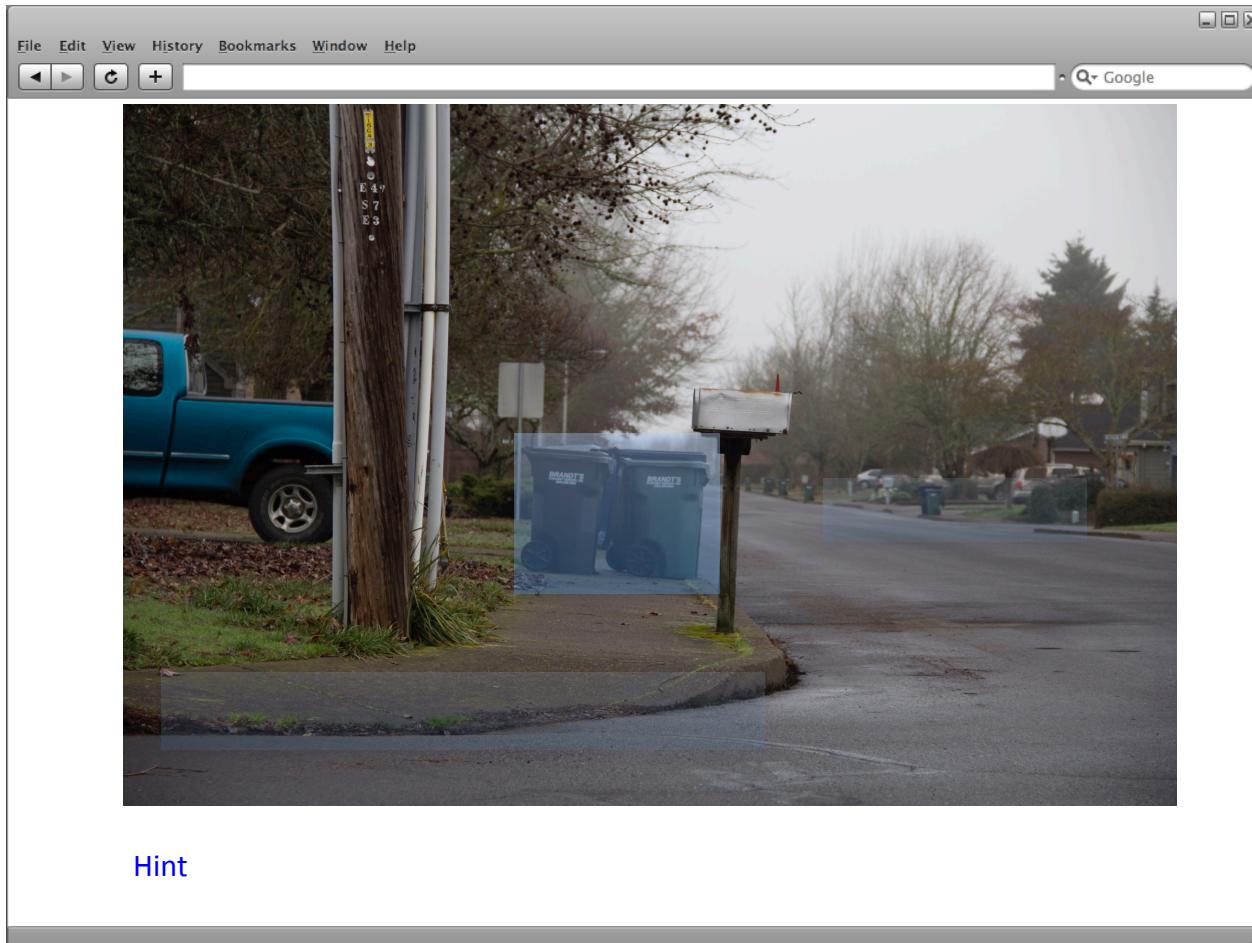

Proposal:
Handicap Fails

The landing page will contain three options for viewing the collection:

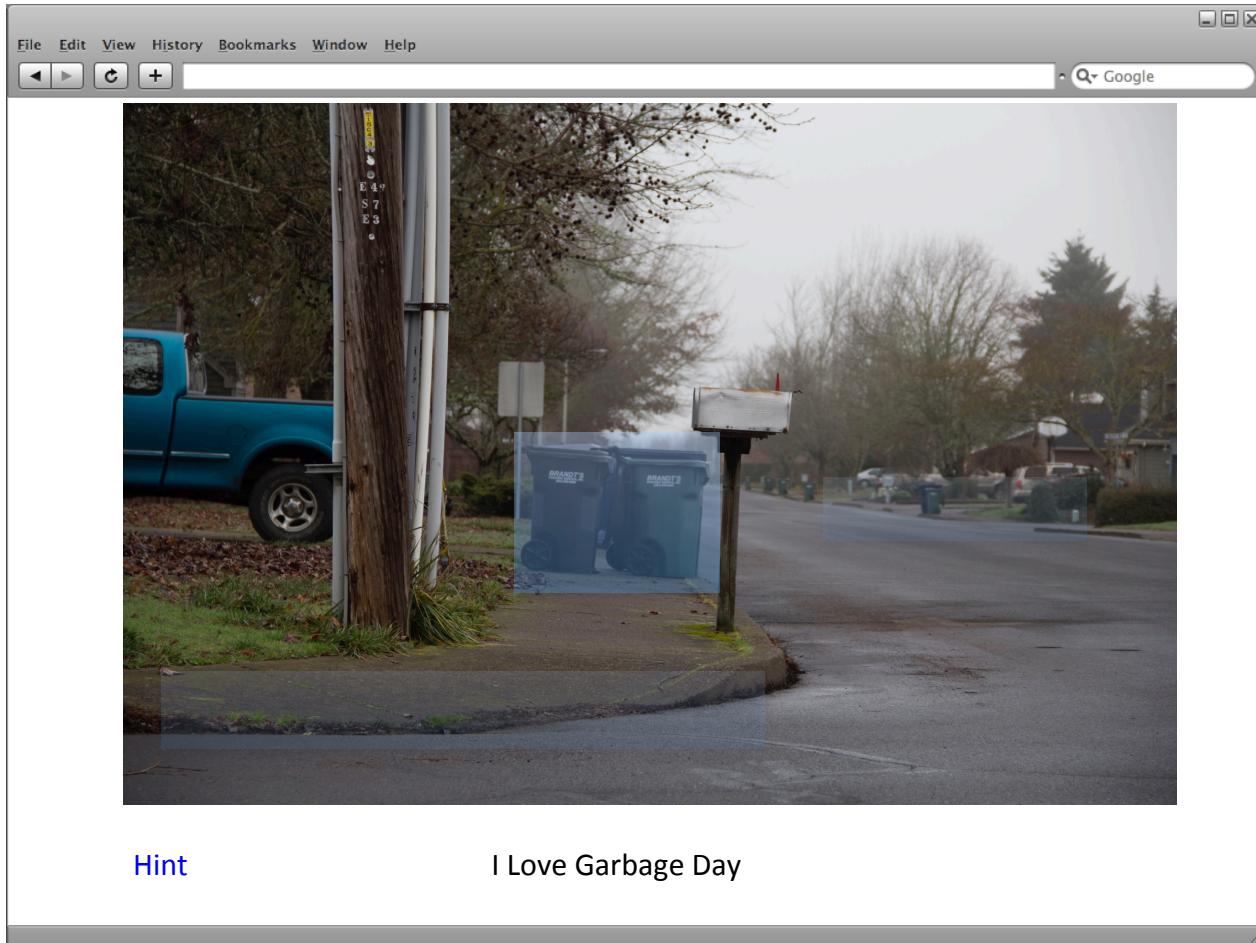

- 1) Titled: The Joys of Life, will take the user through the entire collection
- 2) Titled: I'm Glad it's Not Raining, will take the user through the outside handicap fails
- 3) Titled: I'm Here, Now What?, will take the user through the inside handicap fails

Each image will contain several clickable areas, but only when you click on the handicap fail will you be able to move on to the next image. This structure of the site will reinforce the collection as a collection of obstacles as each user is forced to deal with the obstacle before they are able to move forward.

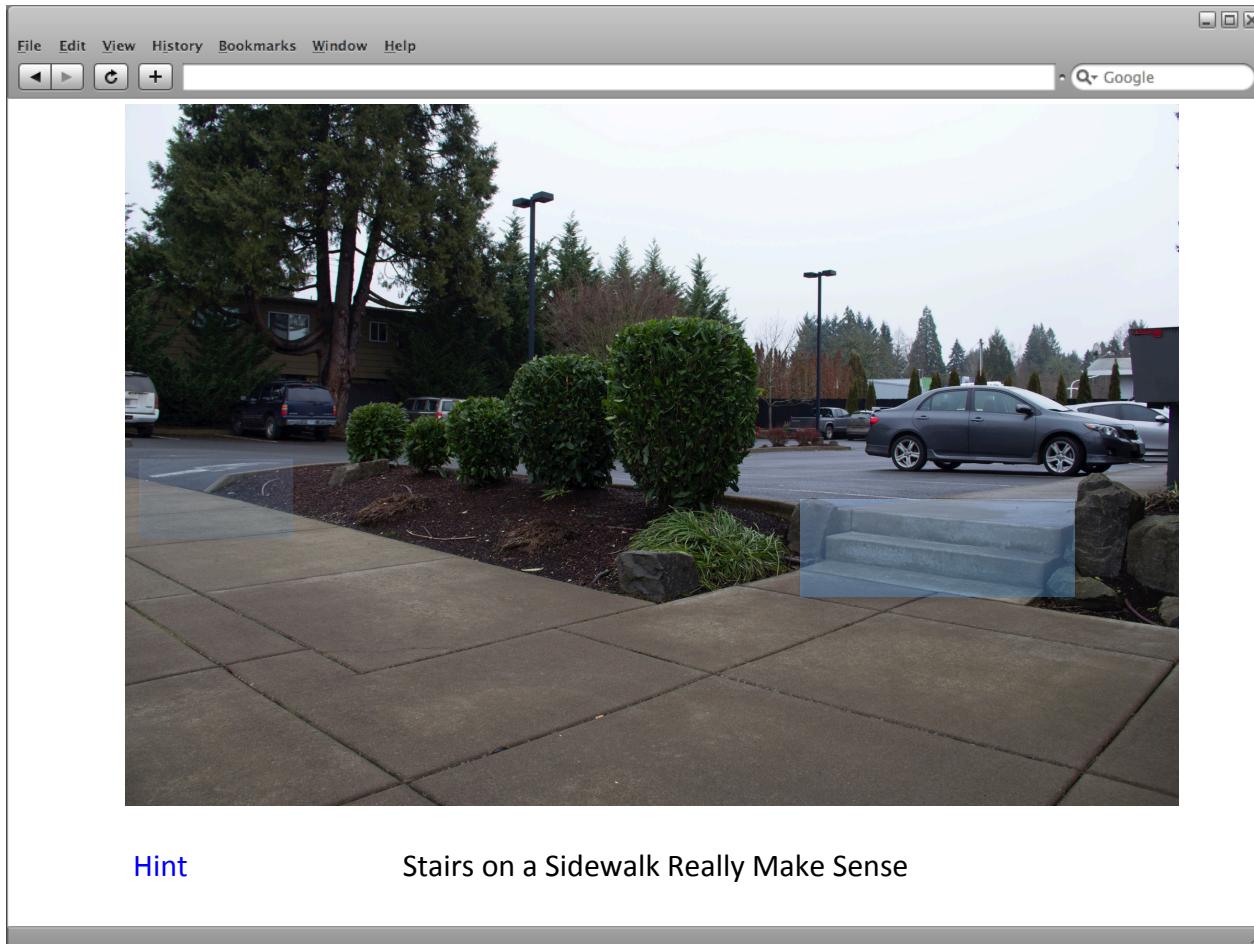

When you click on the hint button below it will reveal a sarcastic comment intended to assist the user in finding the handicap fail.

I Love Garbage Day

Hint

Stairs on a Sidewalk Really Make Sense

My hope is that this does not remain a static collection, but one that will grow over time as I encounter new obstacles and as users choose to submit handicap fails that they find as well. I will continue to manage this collection.

Hint

Button, button, where is the button?
